Lusophone International Symposium paves the way for regulatory harmonization of clinical trials

The International Lusophone Symposium "Lusophone Regulatory and Procedural Harmonization for Clinical Trials: Is It Possible?" was held on September 25th at the Portuguese Pharmacists' Association in Lisbon, bringing together representatives from Angola, Cape Verde, Guinea-Bissau, Mozambique, São Tomé and Príncipe, and Portugal. The initiative marked the first year of the CT Luso project and marked a decisive moment in the process of building a common space for the development of research and clinical trials in the Portuguese-speaking world.

International workshop strengthens Portuguese-speaking cooperation in clinical trials

On September 24, the Portuguese Pharmacists' Association (Ordem dos Farmacêuticos) in Lisbon hosted the "International Lusophone Workshop: Building Lusophone Regulatory and Procedural Harmonization for Clinical Trials." The meeting brought together legal experts, heads of regulatory authorities, and ethics committees from Portuguese-speaking

countries (PALOP) with the aim of promoting legislative and procedural convergence in the area of clinical trials.

12th CT Luso meeting highlights International Symposium and training results

At the 12th CT Luso project coordination meeting, held via Zoom on September 10, the success of the CT Luso Training Cycle, which ran from December 2024 to June 2025, was highlighted. The program included participants from Angola, Cape Verde, Guinea-Bissau, Mozambique, and São Tomé and Príncipe, as well as a minority from Portugal. A total of 234 participants successfully completed the training, and 90% received grades equal to or higher than "Good."
